

RADIANT ROUND INFRARED HEATERS

- **Infrared Heaters for Wire, Cable, Fiber Optics, Tubing, and Extruded Profiles**
- **Single or Multiple Zones**
- **Clear Quartz tube in center for High Efficiency and higher rates of heat transfer**
- **Quartz tube prevents product from touching the heater elements**
- **Construction includes High Temperature Insulation, Electric Resistance Heating Elements, Thermocouple and easy to mount housing**
- **Available in standard diameters from 2" to 10" in various lengths up to 60"**
- **Also available in Clam Shell Construction**
- **Can operate in vertical or horizontal position**
- **Can be stacked in multiple units for higher production speeds**
