

INFRARED-AIR PREDRYER –
BOOSTS LINE SPEED BY 50% ON PSA LINE

- **24" long x 72" wide SFA unit**
- **Line speed increased from 100 fpm to 150 fpm**
- **Fast heat up and cool down, rapid response**
- **Medium wave length – ideal for water removal**
- **No quartz or ceramic in front of elements to block energy**
- **Unique combination of Infrared & Air improves drying without skinning the coating surface**
- **Many successful installations**
- **Quick return on investment**
